Education

Master Candidate in Computer Application Technology, Computer Network Information Center, Chinese Academy of Sciences, Beijing, Currently

Current Interests: Grid Technologies, Virtual Collaboration

B.S. in Computer Science and Technology, Nanjing University of Science and Technology, Nanjing, Jiangsu, 2005

GPA 3.76

Experience

Software Developer---CNIC, CAS March 05---May 05

- Designed and implemented a GridFTP-based data transfer tool in the grid environment
- Supported server-to-server and server-to-client data transfer
- With a user-friendly interface and platform independent
- Based on Globus Toolkit and GSI authentication
- Java, SWT, JFace and Linux

Intern as Software Developer---France Telecom, Beijing Research Center April 06---July 06

- Designed and implemented the user interface of the instant messaging module in the project of LIPS(Linux Phone Standard
- Assisted in implementing the enable service of the IM module
- Supported functions of subscribing and sending messages
- C, Linux, GTK and XOO

Research on Collaboration Platform in the Virtual Laboratory---CNIC, CAS Sep 06---Dec 06

- Developed and implemented the collaboration platform based on an open software JSPWiki
- Supported page architecture organization, attachment move and copy, Chinese encoding.
- Java, Jsp, Servlet and Linux

Hobbies

- Play piano
- Member of the Doctoral Chorus of CAS
- Travel
